

**Position Title:** QC Chemist (Team Member)

**Reporting to:** QC Team Lead

**Location:** MSNPI

**Position Description:**

The QC Chemist is responsible for evaluating products or materials to ensure compliance with quality specifications. This role involves conducting routine testing, analysing results, identifying defects, and recommending improvements or corrective actions. The QC Chemist works closely with production and quality assurance teams to monitor and control product quality during production.

**Education Background:**

Bachelor's or Master's Degree in Chemistry, Biology, Life Sciences, or related fields

**Work Experience:**

Minimum of 2-4 years of experience in a quality control or related role within the pharmaceutical industry, including hands-on experience with testing equipment and documentation tools.

**Key Responsibilities:**

- Perform routine testing of products, materials, and components to ensure they meet quality standards.
- Record and document test results, including non-conformance or defect findings.
- Analyse defects, inconsistencies, or deviations, and recommend corrective actions.
- Ensure compliance with industry regulations (e.g., GMP, FDA, and ISO).
- Collaborate with production and QA teams to improve quality and resolve issues.
- Participate in investigations of quality issues and corrective and preventive actions (CAPA).
- Ensure proper calibration and maintenance of test equipment.

**Required Skills:**

- Strong analytical and problem-solving abilities
- Knowledge of quality standards (e.g., ISO, FDA, GMP)
- Attention to detail and technical expertise
